

Prepare for wildfire smoke!

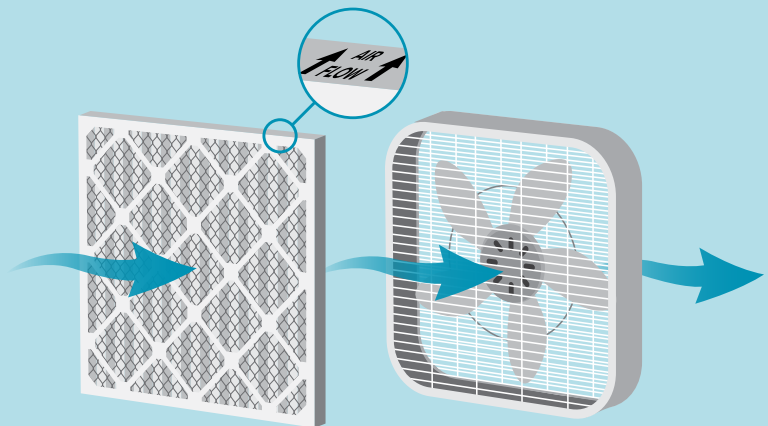

Rev. Aug. 7, 2025

Make your own box fan filter.

You'll need:

- ☐ 20-inch box fan.
- ☐ 20-inch furnace filter with 11–14 MERV rating.
- ☐ Bungee cord or tape.

Attach filter to back of fan with bungee cord or tape.

Make sure airflow arrows on filter point to front.

- ❗ Use in a small room with windows and doors closed.
- ❗ Change filter when dirty.
- ❗ Don't leave fan on when you aren't in the room.
