Income verification:

Use the table below to select your annual household income category. To qualify for financial assistance your annual household income must be at or below 80% of Area Media Income (AMI). Estimate your annual household income by adding the gross income (income before taxes and deductions) of everyone in your household together. Example: Martha has 4 people living in her household, including herself. She falls under AMI Category D. If her household income is at or below $101,850, she qualifies. If her household income is above $101,850, she does not qualify for this program.
