

Healthy Homes

Keep your family healthy.

Practice good cleaning habits.

Vacuum and damp-dust to reduce dust particles.

Clean spills immediately.

Cover trash and dispose in trash containers.

Clean bathrooms, kitchens and other surfaces with simple cleaning products like vinegar and baking soda.

Clean and disinfect surfaces people touch often with an EPA-approved disinfectant.

Look for mold.

- Check windows, showers and other areas for mold.
- Clean mold with soap and water. Don't use bleach.
- Dry area completely.

Get fresh air.

- Turn heaters off, open windows to bring in fresh air, and turn on bathroom and kitchen exhaust fans for 10-15 minutes a day. If weather permits.
- Avoid scented products like plug-in air fresheners, aerosols or perfumes.
- Don't smoke or vape indoors.

Test alarms.

- Press button on smoke alarm and carbon monoxide detectors.
- Listen for the sound.

Open windows when you use cleaning products or disinfectants.

- Don't mix cleaning products.
- If you use bleach, follow directions to dilute. Only mix bleach with water.
