The standard for approved shellfish growing waters is fecal coliform geometric mean not greater than 14 organisms / 100 mL with an estimated 90th percentile not greater than 43 organisms / 100 mL. The above table shows bacteriological results in relation to program standards.

Data from 10/24/2023 sampling has not been through QA/QC yet and is subject to revision.

\*N/A – SRS criteria require a minimum of 30 samples from each station. Station 881 only has 19 samples.
