Report immediately, 24/7—Call (253) 649-1412.

- Amebic meningitis.
- Anthrax.
- Botulism (foodborne, wound, infant).
- *Burkholderia mallei* (glanders) and *pseudomallei* (melioidosis).
- Cholera.
- Coronavirus infection (SARS, MERS, COVID-19).
- Diphtheria.
- Domoic acid poisoning (amnesic shellfish poisoning).
- *Haemophilus influenzae* (invasive disease) (children under 5 years old).
- Influenza (novel or unsubtypeable strain).
- Measles (rubeola) (acute).
- Meningococcal disease (invasive).
- Mpox.
- Outbreak (suspected foodborne or waterborne origin).
- Paralytic shellfish poisoning.
- Pesticide poisoning (hospitalized, fatal, cluster)—**Call (800) 222-1222**.
- Plague.
- Poliomyelitis.
- Rabies (confirmed human or animal) (suspected human exposure).
- Rubella (including congenital rubella syndrome) (acute).
- Shiga toxin-producing *E. coli* infections (including but not limited to *E. coli* O157:H7).
- Smallpox.
- Tularemia.
- Vaccinia transmission.
- Viral hemorrhagic fever.
- Yellow fever.

Report within 24 hours.

- Baylisascariasis.
- Brucellosis.
- *Candida auris* infection or colonization.
- Hantaviral infection.
- Hepatitis A (acute).
- Hepatitis B (acute).
- Hepatitis C (acute).
- Hepatitis C (perinatal).
- Hepatitis D (acute or chronic).
- Hepatitis E (acute).
- Legionellosis.
- Leptospirosis.
- Listeriosis.
- Mumps (acute).
- Pertussis.
- Psittacosis.
- Q fever.
- Salmonellosis.
- Shigellosis.
- Tuberculosis (confirmed or highly suspicious).
- Vancomycin-resistant *Staphylococcus aureus* (not vancomycin-intermediate).
- Vibriosis.
- Yersiniosis.
- Unexplained critical illness or death.

Report within 3 workdays.

- Acquired immunodeficiency syndrome (AIDS) (including people previously reported with HIV).
- Anaplasmosis.
- Arboviral disease (acute) (including, but not limited to, chikungunya, dengue, eastern and western equine encephalitis, Japanese encephalitis, LaCrosse encephalitis, Powassan virus, St. Louis encephalitis, West Nile virus, Zika virus).
- Babesiosis.
- Campylobacteriosis.
- Carbapenem-resistant Enterobacteriaceae infections (limited to *Klebsiella* species, *E. coli*, *Enterobacter* species).
- Chagas disease.
- Chancroid.
- *Chlamydia trachomatis* infection.
- Coccidioidomycosis.
- *Cryptococcus gattii* or undifferentiated *Cryptococcus* species (e.g., *Cryptococcus* not identified as *C. neoformans*).
- Cryptosporidiosis.
- Cyclosporiasis.
- Cysticercosis.
- Echinococcosis.
- Ehrlichiosis.
- Giardiasis.
- Gonorrhea.
- Granuloma inguinale.
- Hepatitis B surface antigen-positive pregnant woman.
- Hepatitis B (chronic) (initial diagnosis and previously unreported cases).
- Hepatitis B (perinatal) (initial diagnosis).
- Hepatitis C (chronic).
- Herpes simplex (neonatal, genital) (initial infection).
- Histoplasmosis.
- HIV infection.
- Human prion disease.
- Immunization reactions (severe, adverse).
- Influenza-associated death (lab-confirmed).
- Lyme disease.
- Lymphogranuloma venereum.
- Malaria.
- Pesticide poisoning (non-hospitalized, non-fatal, non-cluster)—**Call (800) 222-1222**.
- Relapsing fever (borreliosis).
- *Rickettsia* infection.
- Syphilis (including congenital).
- Taeniasis.
- Tetanus.
- Tick paralysis.
- Trichinosis.
- Typhus.
- Varicella-associated death.

Report within 7 workdays.

- Tuberculosis infection (latent) (positive tuberculosis skin test or interferon-gamma release assay, e.g., QuantiFERON®-TB Gold).

Report monthly.

- Asthma (occupational) (suspected or confirmed)—**Call (888) 66-SHARP**.
- Birth defects (autism spectrum disorders, cerebral palsy, alcohol-related)—**Call (360) 236-3533**.
