

Pediatric COVID-19 Vaccine Safety

Make sure your kids have the best protection against COVID-19 to stay healthy.

The state indoor mask requirement ended March 12 for most settings, including schools.

COVID-19 vaccine is safe for kids and protects against serious illness.

Over **8.9 million** 5–11 year-old children in the United States have received at least 1 dose of Pfizer COVID-19 vaccine.

Most side effects are **mild** and **brief**:

- Pain at injection site.
- Fatigue.
- Headache.

Side effects are more common after the second dose.

Serious health events in ages 5–11 are **extremely rare**.

Only **12** cases myocarditis (heart inflammation) in the United States.

All patients were sent home.
